Do not reuse (single use).

about **3** hours **40~50°C**

- The duration of the warming effect of SENNENKYU TAIYO is about 3 hours.
- The average temperature on the skin surface is about 40 to 50°C.

### How to Use SENNENKYU TAIYO Which Does Not Require Fire

Remove SENNENKYU TAIYO from the sealed package, peel off the seal from the top (convex portion) and the surface to be placed on the skin (the base) and affix to the affected area.

- To activate (produce heat), unseal the top of the packaging.
- Do not apply the product to the same spot repeatedly. As a general guide, use the product once a day.
- Do not leave the product on the skin for more than 3 hours.
- Do not apply the product to the same spot repeatedly.
- Do not leave the product on the same spot for more than 3 hours.
- Do not apply the product to the same spot repeatedly. Do not leave the product on the same spot for more than 3 hours. Adjust the duration of use according to the temperature and humidity, your physical condition, the condition of your skin and the situation of use.

### Please be sure to read these instructions before use.

Be cautious of low-temperature burns and other skin problems.

### Do not use if you are:

- Persons whose skin becomes easily irritated due to a skin disorder, sensitivity or imbalance.
- Persons who are unable to remove the product from the skin themselves
- Children and infants

### Do not use on the following locations:

- Face ● Mucous membranes
- Areas of eczema, skin irritation or open wounds
- Newly injured parts of body, including bruises and sprains

### Do not reuse the product.

### The following persons should consult a physician or pharmacist prior to use:

< Important basic cautions >

- Persons who have had an allergic reaction to a medicine or cosmetic product, including rashes, redness, itchiness and irritation
- Pregnant women
- Persons who have circulatory disorders or who have limited sensitivity to heat, such as diabetics

### Precautions for Use

- Never use an open flame with these products.
- Do not rub, cut, tear or wet the product before use.
- To activate (produce heat), unseal the top of the packaging. Once the package has been unsealed, it cannot be stored. The heat will dissipate after a specific period of time.
- Avoid use immediately before and immediately after bathing.
- Use particular caution when using the product while sleeping.
- Do not use when suffering a fever.
- Do not leave the product on the same spot for more than 3 hours.
- Do not use this product and heating equipment simultaneously, such as a kotatsu or similar heated furniture, disposable heat pads, electric blankets or heated floor rugs.
- Once the product has been applied to the skin, do not allow pressure to be applied from bedding, supporters, belts, handbags and the like.
- Do not apply the product to the same spot repeatedly. As a general guide, use the product once a day. Be cautious of **skin problems, such as low-temperature burns**, if you are a first-time user or have sensitive skin.
- People with sensitive skin that gets irritated easily should take their skin condition into account before deciding to use the product, as it may cause **skin problems, such as low-temperature burns.**
- If you develop **skin problems, such as low-temperature burns**, while using the product, some skin may peel off when removing the product, so detach the product slowly and carefully.
- Use with caution in places where you sweat a lot. You should be particularly careful of sweat from early summer to early autumn, a period when both temperature and humidity are high.
- If the heat becomes intense or causes discomfort, such as itchiness, remove the product immediately.
- Be aware that the product may cause **skin problems, such as low-temperature burns**, in the body's least sensitive areas, such as the buttocks.

## Features

1. It is not necessary to light this product on fire.
2. It can be applied directly to the skin to treat areas of concern (moxibustion points.)
3. The heat lasts up to 3 hours.
4. Thermal stimulation: Heat around 40-50 °C improves blood circulation and relieves muscle fatigue and stiffness.
5. It is not necessary to light this product on fire, and it is nearly odorless, making it a convenient option to use while you are away from home.

### Conditions Increasing Susceptibility to Low-temperature Burns

High temperatures	Sensitive skin
High humidity	Swollen skin
Excessive fatigue	Perspiring skin

## How to Find Moxibustion Points

1. Find moxibustion points on your body.
2. Stroke areas where you think moxibustion points are located with your finger. Moxibustion points include **depressed areas, areas of dry skin, areas that feel painful when light pressure is applied.**

## How to Use SENNENKYU TAIYO Which Does Not Require Fire

Apply on the hard-to-reach shoulder.

Safe and secure treatment ideal for mothers

Apply on the skin and cover it with clothes when going out. A convenient option to use while at work and during travel.

Use it in places you wish to heat slowly.

People's heat perception is influenced by their physical condition and the location the product is applied on. Big, rapid movements may dislodge the product. Please handle with care.

## Moxibustion with 100% Natural Mugwort

The moxibustion product is made of 100% natural mugwort.

Moxa has been used since ancient times, and knowledge about using the gifts of nature has been passed down through generations.

SENNENKYU was developed to introduce a moxibustion product that is easier and more pleasant to use.

## Product Lineup

The lineup includes a small pack that is easy to carry when going out as well as a large pack that is a good value.
